I pay XM radio for their service every month. I absolutely love my satellite radio. Please do not allow the big business-backed conglomerates to control even more of what I hear and see. XM's enhanced service of traffic and weather is fantastic. Freedom of Choice is the single greatest aspect of our country - please don't allow the NAB to take that choice away from us! XM has just as much right to dedicate their bandwidth to traffic as it does sports, news or music.
